Salad Dressing, Royal Brand, bottle .50

Salad Dressing, Premier Brand, per bottle, 35c & 50c

A complete line of other Fresh Fruits

and Vegetables arriving daily.

CHAUTAUQUA IS NOW GOING GOOD

The Chautauqua festival opened on Monday in the spacious and comfortable arena and is now going on in grand style. The attendance is nearer up to the standard of former years, but the performances are fine and are being greatly enjoyed and appreciated. We will endeavor to give a short account of each day's entertainment up to Wednesday night. The balance of the week's festivities will be in our next issue.

Monday

Afternoon—The superintendent, Mr. O. Dwight Clark, formally opened the Chautauqua with a few well chosen remarks and introduced the All Sisters Saxophone Quartet to the gathering who were present. The Sisters gave a most enjoyable performance and their sketches of wit and humor won a place in the hearts of the audience. Their renderings on the saxophone were marvelous and even those who have heard these instruments before, hardly believed it possible that they could produce such excellent music.

Evening—The Saxophone Quartet again pleased a fair sized audience and Capt. "Dinky" Upton gave his lecture, "Re-creation thru Recreation" in a manner that was pleasing to all. He dealt mainly with the problems of teaching children to play their games straight so they would be prepared to meet and play the game of life straight. He also pointed out that it was the duty of mothers and fathers to take more interest in the every-day life of their children.

Tuesday

Afternoon—The Adanacs, Canadian Male Quartet took up the whole afternoon performance and delighted those present. They included a couple of comic songs in their selections and we can safely say that they rendered

CROWS' NEST PICNIC GREAT SUCCESS

The picnic at Crows' Nest on Saturday and Sunday last was one of the most enjoyable affairs that has been held in the Pass for some time. The baseball game Saturday night went to the Grassy Lake team by a score of 13-4, thereby breaking the winning streak (7) of the Crows' Nest team. The dance in the Summit hotel that evening was largely attended and a fine time is reported. On Sunday afternoon a mixed team of baseball players from The Pass held the Grassy Lake team to a tie, three all. This game, as the score indicates, was a good one to watch and was close and exciting all through. Pruden pitched for The Pass boys and the Grassy team only secured practically one safe hit. He received fine support from his team mates also.

ODDFELLOWS NOTICE!

Memorial services will be conducted on Sunday afternoon, June 25th, at 3 p.m. A full attendance is requested and all members are urged to be present. Visiting Brethren and Rebekahs are cordially invited to attend.

all their selections in a manner that cannot be equalled. Their voices are strong and melodious and every note was clear and distinct.

Evening—The Adanacs opened the evening performance and were again greatly enjoyed. Herbert Leon Cope then gave his lecture on "Family Remedies," not a medicine, but better—a good old fashioned hour or more of laughter and fun. It seemed to make everyone feel that their hearts had opened up and their facial muscles could not pucker up a frown for love nor money. One just had to laugh, for Mr. Cope stuck by his nickname of "Kill The Blues" Cope. He delivered his lecture in an able and eloquent manner which pleased everyone.

Wednesday

Afternoon—The "Eller-Willoughby Ladies' Orchestra, and the half holiday turned out the best afternoon's audience of the three days. The orchestra gave violin and cello solos as well as orchestral selections and they were greatly appreciated. Alex. Thomson, speaking on the subject of "Present Day Problems of Self-Government," was then introduced. Mr. Thomson spoke mainly about the situation in India and Ireland and was very well posted on his subject. His lecture was thoroughly enjoyed.

Evening—The Ladies' Orchestra, assisted by Fenwick Newell, Canadian Lyric Tenor, formed the attraction for the evening performance. The orchestra, with the assistance of Mr. Newell, rendered music of the kind that gives the third day the name of Music Day. Mr. Newell's voice is certainly all that is said to be, and his singing was a rare treat. He has plenty of expression and sings with refinement and grace, which easily places him in the front rank of tenor singers of the world. The patrons were overjoyed with the performance of Music Day and it will be long remembered by all who were present.

Financially, this Chautauqua this year is far from a success. Otherwise, there is nothing lacking. The performances are excellent, but the people this year do not seem to have the same old Chautauqua spirit of former years. What is the reason for this is hard to say. The committee have worked hard to try and entice the public as much as possible, but it seems that they have been unable to do so, and as a result, they will have to dig down and dig deep to meet the guarantee. It is to be regretted, but there is no way out of the matter

CLOSE RACES

An Englishman, a Scotman, and an Irishman were indulging in reminiscences of sporting occasions.

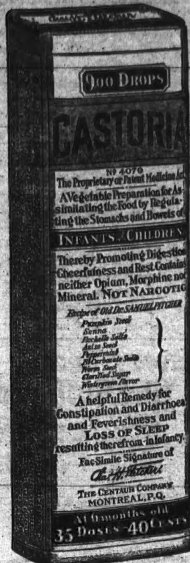

"The closest race I ever saw was a yacht race," said the Englishman,

"In which one of the boats that had been recently painted won by the breadth of the coat of paint."

"The closest race I ever saw," declared the Scotman, "was one in which a horse, stung by a bee, won by the height of the swelling on his nose."

"The closest race I ever saw," said the Irishman, "is the Scotch."

Children Cry For Fletcher's CASTORIA

Special Care of Baby.

That Baby should have a bed of its own all agreed. Yet it is more reasonable for an infant to sleep with grown-ups than to use a man's medicine in an attempt to regulate the delicate organism of that same infant. Either practice is to be shunned. Neither would be tolerated by specialists in children's diseases.

Your Physician will tell you that Baby's medicine must be prepared with even greater care than Baby's food. A Baby's stomach when in good health is too often disarranged by improper food. Could you for a moment, then, think of giving to your *ailing* child anything but a medicine especially prepared for Infants and Children? Don't be deceived.

Make a mental note of this—It is important, Mothers, that you should remember that to function well, the digestive organs of your Baby must receive special care. No Baby is so abnormal that the desired results may be had from the use of medicines primarily prepared for grown-ups.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

WORLD HAPPENINGS BRIEFLY TOLD

Fresh apples are now being shipped from the North Pacific ports direct to Europe by way of the Panama Canal. At a meeting of directors of the Canadian Pacific Railway, W. N. Tilly, K.C., Toronto, was elected to fill the vacancy on the board caused by the death of Sir John Eaton.

The bill amending the Vancouver Harbor Commissioners Act went through the committee stage in the House June 12. Hon. Ernest LaPointe said the purpose of the bill was to bring Vancouver into line with all the other ports of Canada.

An English syndicate headed by the Duke of Argyll has bought the Huton Willow Ranch, comprising 150,000 acres in San Joaquin Valley, Cal., for a consideration of twelve million dollars, according to advices published by the Los Angeles Times.

Captain A. W. Stevens, aerial photographer, at McCook Field, Dayton, Ohio, broke the world's parachute jumping record when he descended 24,296 feet. He landed at Jamestown, approximately 25 miles from where he left the plane. The descent took thirty minutes.

Third reading was given in the House to a bill to amend the Canada Shipping Act, so as to add to the list of vessels exempt from pilotage dues. Under the bill, the governor-in-council is authorized to exempt from pilotage dues ships of war and hospital ships belonging to specified nations. The idea is to grant the privilege to such nations as grant it to British warships.

Super U-Boat Designed

German Inventor Has Submitted Plans to United States

A 7,000-ton armored submarine cruiser, with an action radius of 23,000 miles, is the battleship of the future, according to its designer, Professor Oswald Flamm, who constructed the commercial submarine, the Deutschland. He has submitted plans of his invention to the United States, Britain and Japan, as Germany is forbidden to build new war craft for decades to come.

The projected super-submarine can make four round trips between the North Sea and the United States without touching any port. It carries two 5-inch and four 3½ inch guns, with 3,000 rounds of ammunition and eight torpedoes, with forty torpedoes. In explaining his plans, Professor Flamm declared that, in case of a war with the United States, Japan, with several of these submarines, could cut off the Pacific from the Atlantic fleet by destroying the entrance to the Panama Canal.

"I would rather," said, "sell my invention to the United States than to any other country, but so far Japan and Britain have been pressing me hard to turn over the complete plans, while the United States has shown only mild interest."

Why Germany Hates France

Because French People Insist on Reparation Says Poincaré

"Surely we desire the resumption of normal relations with Germany," says M. Poincaré, "but we cannot ignore the ferment of hatred which is brewing against France in Germany." No visitor to Germany could possibly ignore it, and it is well that the fact is plainly realized in Paris.

This hatred developed after the armistice. Before that German war hatred was centred on England, and to a lesser degree on America. But as time has gone on these hatreds have virtually disappeared. On the other hand, toward France there was, no American observers report, no hatred at the time of the armistice.

"Why has this reversal taken place? Fundamentally, no doubt, because Great Britain and America, soon lost interest in enforcing the reparation clauses, while France adhered rigidly to the treaty. Partly, no doubt, because Germany, in her humiliation, had to have a scapegoat—New York World.

A Great Gold Hoard

The greatest amount of gold ever assembled in one place lies in a Government building in New York. Its value is fifteen hundred million dollars, and it is said to represent one-fifth of all the gold that has been produced since the beginning of civilization.

In Japan books are bound with the edges in, the readers begin at the back and go forward, and they read vertically instead of horizontally.

The man who boasts of being a cynic is usually more foolish than dangerous.

A Suit That Is New.

The ever popular box coat is distinguished this season by the flaring or bell sleeves—as in this attractive suit made of midnight blue twill and trimmed with diamonds of mauve ribbon attached with steel beads. An hat of imported milan completes a costume that is due to cheer the heart of the most fussy little lady.

You May Be Ill To-night Have You a Remedy?

It may be a disordered stomach, perhaps cramps or acute indigestion, if you have no remedy handy, you are bound to suffer. Twenty drops of Nerviline in sweetened water will ease the pain and enable you to get a good night's sleep. Whether it is Neuritis, Sick Headache, or some other minor ache or pain, Nerviline can be used internally or externally and will be found a true friend for every family. Large 35c bottles sold everywhere.

Shifting the Blame
"Your advertisement describes this as all wool. It is nearly all cotton." "Yes, that's the worst of the newspapers. You can hardly believe a word they say."

Nervous Breakdown COULDN'T SLEEP NIGHTS

To those on the verge of a nervous breakdown the following symptoms present themselves: nervous headache, a feeling of depression, listless, restless and unrefreshing sleep, often troubled with frightful dreams, avoidance of crowded places, fear of being alone, horror of society, etc.

When the nerves become affected in this way the heart generally becomes affected too, and on the first signs of any weakness of the heart or nerves, flagging energy or physical breakdown do not wait until your case becomes hopeless, but get a remedy that will at once quieten the nerves, strengthen the heart and build up the entire system.

This you will find in

MILBURN'S

HEART AND NERVE PILLS

Mrs. M. Damand, Young's Cove Road, N.B., writes: "I was bothered very much with my heart and nerves; had nervous headaches and dizziness, could not sleep at nights, and my appetite was all gone. I was on a nervous breakdown when a neighbor told me to try Milburn's Heart and Nerve Pills. This I did, and before I had the second box used I was better and would advise anyone who has nerve trouble to take them."

Price, 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Lightning Harmless to Airplane

Air Pilot Escapes Injury When He Meets Current at 100 Miles an Hour

Captain E. D. Herne, a cross-channel air pilot, has had the extraordinary experience of striking the path of a flash of lightning while in flight at a speed of 100 miles an hour.

Captain Herne recently made a record double trip between London and Paris in a single flying day.

While passing along the airway to Paris he observed heavy thunderclouds above the channel. He was skirting these when he suddenly saw two or three vivid flashes of lightning near the machine. The aeroplane seemed to shudder and hesitate, then, recovering itself rapidly, continued smoothly in flight.

Captain Herne called up the nearest land station by wireless telephone and asked whether they thought the trailing wire of his apparatus might be connected with this phenomenon. They advised him to wind it in as soon as possible, which he promptly did.

It has often been a matter of speculation what would happen should an aeroplane in flight come in the path of a flash of lightning. Some experts declared—and Capt. Herne's adventure offers the first confirmation of their argument—that the lightning would flow around the machine and down its wireless aerial and continue earthward without damaging the craft.

Way to Reduce Armaments

The way to reduce armaments in Europe is to reduce the suspicions and fears that cause armies to be maintained. But that cannot be done until the light of common sense breaks in Russia; until the numerous boundary questions that blur the map of Europe are out of the way; until Greece, Italy, France and Great Britain are satisfied with the state of affairs in the Near East, and until France is convinced that Germany will carry out all of the terms of the treaty of Versailles—Detroit Free Press.

O. McPherson, Furniture Dealer, Undertaker, 17 Armstrong, St. Minard's Liniment Co., Ltd., Toronto, Ont.

Dear Sir:—Since the start of baseball season we have been bothered with our muscles, sprained ankles, etc. But just as soon as we started using Minard's Liniment our troubles ended. Every athlete should keep a bottle of your liniment handy.

Yours truly, W. E. McPherson, Secretary of Armstrong High School, Montreal, Que.

Educating Soldiers' Children

Children of Ex-Servicemen in Saskatoon Receiving Education Through Financial Assistance

A total of 3,457 children of ex-servicemen in Saskatchewan out of a possible 3,728 are receiving their education through financial assistance provided by the province. An act was passed in May, 1920, designed to enable children of deceased or disabled soldiers who, but for its provisions might be compelled to relinquish their school career, to pursue their studies in the higher educational establishments. So successful has this work proven that two other provinces of the Dominion are now contemplating an act similar to that of Saskatchewan.

No such city as Troy, or people as Trojans, were known in historic times.

Ask for Minard's and take no other

The world's consumption of sugar is estimated at between 14,000,000 and 15,000,000 tons a year.

Hall's Catarrh Medicine

Those who are in a "run down" condition will notice that Catarrh bothers them much more than when they are in good health. This fact proves that while Catarrh is a local disease, it is greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a "Tonic and Astringent" that acts upon the mucous surfaces of the body, thus reducing the inflammation and assisting Nature in restoring normal conditions. All Druggists. Circulars free. J. C. Cheney & Co., Toledo, Ohio.

18,222 French Prisoners Died

A total of 18,222 French war prisoners died in Germany during the war, it was announced officially by War Minister Maginot.

DAUGHTER WAS WEAK AND NERVOUS

Mother Gave Her Lydia E. Pinkham's Vegetable Compound with Happy Results

Cobourg, Ontario—"Lydia E. Pinkham's Vegetable Compound" was recommended to me for my daughter.

She had trouble every month which left her in a weak and nervous condition with a weak back and pain in her right side. She had these troubles for many years and frequently was unable to attend school. She became regular and feels much better since she began taking the Vegetable Compound and attends school regularly—Mrs. J. M. Toms, Hall St., Cobourg, Ontario.

Every mother who has a daughter suffering from such symptoms should give Lydia E. Pinkham's Vegetable Compound a trial. It is prepared from roots and herbs, and can be taken in safety by young or old. It has been used nearly fifty years, and many women owe their good health today to the timely use of Lydia E. Pinkham's Vegetable Compound.

MINE RESCUE AND FIRST AID CONTESTS WILL BE AT BANFF, JUNE 30 AND JULY 1

The province of Alberta is still setting the pace in Mine Rescue and First Aid work. This work is directly under the supervision of the Workmen's Compensation Board. Mine Rescue Stations and Cars are now located in the various districts of the province for the training of the employees in this very important work for fighting the many dangers which have to be faced by these trained men after any mining disaster. Their efficiency in this work has been well demonstrated at these annual contests.

These Mine Rescue Cars and Stations are fully equipped with up-to-date self-contained breathing apparatus and all the necessary First Aid supplies, also carrying large supplies of oxygen and chemicals. All equipment and training of men throughout the province is standardized, which has proved to be a factor of efficiency in the organization of this work in Alberta.

Mine Rescue Car No. 1, Crow's Nest Pass, under the charge of Supt. Edward Royle; Mine Rescue Car No. 2, west of Calgary, under the charge of Supt. W. B. Powell; Mine Rescue Car No. 3, Drumheller and Big Valley, under the charge of Supt. John Hooker; Mine Rescue Car No. 4, Edmonton, under the charge of Supt. F. Adams; Mine Rescue Station, Northgate, under the charge of Supt. J. A. Stewart; Mine Rescue Station, Mountain Park, under the charge of Supt. James Derbyshire; Mine Rescue Station, Commerce, Mine Rescue Station, Coalhurst, Hardville, Taber, under the charge of Supt. Samuel Troman.

Twenty-five per cent. of all the miners and officials employed underground in the province have been trained in Mine Rescue work, and nine per cent. have also taken a course of instruction in applying first aid to the injured.

The Mine Rescue and First Aid Contest which is held under the auspices of the Rocky Mountain Branch of the Canadian Institute of Mining and Metallurgy will be held in Banff June 30th and July 1st. Immense interest throughout the province is very noticeable in preparation for

the many Mine Rescue and First Aid teams who are going to take part.

The contesting in this work is going to be very keen, as many of the teams which took part in the 1921 contest are contestants for this year, having shown an increase of 28.6 per cent efficiency in the work to the previous contest in 1920. This contest has now reached the stage of being a very important annual event and is creating a keen interest in this work with the employers and employees, which is well shown by the support they give to this annual contest.

The organization of this contest is directed by Duncan McDonald, general superintendent Mine Rescue and First Aid department, Calgary, and the Secretary-Treasurer is James Crowder, Inspector of Mines, Blairmore, to whom all entries for taking part in the contest were sent in before the 15th of June. The organization of this work has been well demonstrated in the efficiency that was shown by the contesting teams in the previous contests. The following are the teams who are taking part in the contest at Banff.

Mine Rescue
West Canadian Collieries, Ltd., Blairmore, 2; West Canadian Collieries, Ltd., Bellevue, 2; Alberta Block Coal Co. Ltd., Drumheller, 1; Hy Grade Coal Co., Drumheller, 1; Brazeau Collieries, Ltd., Northgate, 1; C. P. R. Mine No. 6, Lethbridge, 2; Canmore Coal Co. Ltd., Canmore, 2; C. P. R. Mines, Banffhead, 1; Big Valley Collieries, Ltd., Big Valley, 1. Total 13.

Senior First Aid
West Canadian Collieries, Ltd., Bellevue, 1; C. P. R. No. 6 Mine, Lethbridge, 2; Brazeau Collieries, Ltd., Northgate, 1; Canmore Coal Co. Ltd., Canmore, 1; International Coal & Coke Co. Ltd., Coleman, 1; McGillivray Creek Coal & Coke Co. Ltd., Coleman, 1; Drumheller Lund Co., Drumheller, 1; Big Valley Collieries, Ltd., Big Valley, 1; C. P. R. Mines, Banffhead, 1. Total 16.

Junior First Aid
Boy Scouts, Hillcrest, 1; Boy Scouts, Bellevue, 1; Boy Scouts, Lethbridge, 2; Boy Scouts Banffhead, 1;

Boy Scouts, Calgary, 2. Total 6.

This contest is open to all juvenile organizations and Ladies' First Aid Associations. The Mine Rescue Cars to be used at the contest will be located at the C. P. R. depot, Banff, and it will be of interest for visitors to make themselves acquainted with the arrangements and equipment attached to these cars while they are located at Banff.

This contest is open to all competitors in the Dominion of Canada and United States but to date, no entries have been made by teams outside of the province. There was good representation from British Columbia at the contest held at Blairmore, 1921, and we are hoping to have entries from the sister province.

The tests that are given to the competing teams in the contest is work that would have to be completed by them after mining disasters and the greatest of credit is due to these teams in the able way they perform their work as demonstrated to the public. This province is second to none on the North American continent in the carrying-on of this all important work, and also in the organization of this work which has direct connection with the mining industry of the Province of Alberta. The tests for this year will be made with a view of the increased efficiency that was shown by all competing teams at the contest for 1921.

Ladies' First Aid Teams
Y. W. C. A., Calgary, 2; Central Nursing Division No. 39, Calgary, 2. Total 4.

Judges for Mine Rescue
Mr. Robert Strachan, Senior Inspector of Mines, Fernie, B.C., Mr. J. McDonald, Inspector of Mines, Fernie, B.C., Mr. N. Howells, Inspector of Mines, Lethbridge, Mr. M. Johnstone, Mine Manager, Chinook Coal Co., Commerce, Alta., Mr. Wm. Hetherington, Mine Manager, Luscar Collieries, via Coalpur, Alta.

Judges for First Aid
Dr. Brett, Banff, Dr. Worthington, Canmore, Dr. Ross, Drumheller, Dr. Atkin, Banff, Fire Chief Hardy, Lethbridge, Fire Chief Faulds, Taber.

PROVINCIAL NEWS

issued by the Publicity Commission Government Buildings, Edmonton.

New Game Regulations

New regulations concerning the hunting and killing of game in the north country have been put in effect, as announced by Benjamin Lawton, Chief Game Guardian of the Province. For some residents north of parallel 55 have been permitted to kill game at any season of the year for their own use, but this privilege has been obtained by residents and others. At the last session of the legislature the game act was amended to provide that no person shall kill game birds during the open season which in the case of ducks and geese is from September 1st to December 1st, and for prairie chickens and partridges from October 1st to 31. Exception has been made in the case of White Winged Scoters, commonly called Black Ducks. These may be killed at any time north of the 55th parallel. In the case of big game the act now provides that residents of that part of the province residing north of the 55th parallel may kill big game during the close season only after having obtained a resident's big game license, but in no case are big game animals to be killed during the closed season unless required for food.

New Police Commissioner

Announcement has been made by Attorney-General Brownlee of the appointment of W. C. Bryan, superintendent of the Alberta Provincial Police, to be commissioner of the force, in place of Commissioner Alfred Chudy, who has returned east to Toronto. Col. Bryan's appointment became effective June 15. The

offices of the superintendent and commissioner will be combined. Col. Bryan is a former mounted police officer with a long record of police work. He has been with the Alberta force for some years. Recognition has also been given to the services of Inspector Nicholson, chief detective of the force, who also has a notable record of achievement in police work in Alberta, both in the mounted police and the Alberta force.

Over 10,000 applications have been made to the department of education by students wishing to write on the departmental examinations this month. There will be over 1500 examination centres, 1000 of which will be rural where high school entrance examinations will be written.

By-Elections July 10th

Writs for the three by-elections for the Provincial House to be held in the ridings of Ribstone, Whitford and Sedgewick, have been issued, calling for nominations to be held July 3rd, and elections one week later if necessary.

A second action to determine whether or not slot machines are illegal gambling devices, has been commenced by the attorney-general's department in the courts of Edmonton.

The 1923 convention of the church of the Brethren, one of the largest organizations in the world, will be held at Calgary, and will bring about 20,000 visitors, mostly agriculturists, to the province.

Lowering dresses at the top doesn't seem to get them any nearer the floor.

COMMENT

The Quick and The Dead.
Forty ayles. Ball curve. Private service. No flowers.—Peterboro Examiner.

Favoriteism.
Many an indignant husband allows the indulgence to stop with himself.—Ottawa Citizen.

Costly Conversation.
The man who talks that talk is cheap has never said: "Darling, will you be mine?"—Redirection Mail.

There's A Difference.
When a girl's eyes are downcast, that means modesty; when a man's eyes are downcast that means ankles.—Stafford Beacon.

Alternatives.
When a man tells you he's working up the ground don't assume that he is making a garden. He may be playing golf.—Kincardine Review.

High heels don't necessarily elevate the morals.

A "sucker" sometimes finds it hard to keep his head above water.

A man is as old as he feels—and a woman older than she says she is.

The vain person merely expresses what every person thinks about himself.

Shallow-minded people will wade into deep subjects without the least fear.

How Radium Is Weighed

Tube Is Placed Near Most Sensitive Electrical Instrument

A wonderful account of the vastness of the problem of producing radium was given by Sir Ernest Rutherford the other day at the Royal Institution.

From five thousand tons of the mineral, carnotite only a tenth of the amount is rich enough for the chemist to treat, and this 500 tons, selected by handpicking, produces after many elaborate chemical processes some fifteen grains of radium.

If we represented the picked ore by a line drawn from London to Edinburgh, he said, the actual amount of radium it contained would be represented by a line four inches in length.

One of the most remarkable features of radium is that, in spite of the very small quantities in which it is employed, the exact amount contained in a tube or bottle can be measured very accurately within a few minutes. It is not even necessary to open the bottle to examine the contents.

Radium is weighed, so to speak, by electricity; the phial or tube is placed near a sensitive electroscope—the most delicate instrument we possess for measuring very minute quantities of electricity—and by comparing it with a known standard amount the value of the radium is quickly found.

By this simple method, of testing hundreds of thousands of pounds' worth of radium are sold every year.

Record Sum for Rare Postage Stamp

Thirty-Five Thousand Dollars Paid by American Collector

One of the rarest stamps in the world, a one-cent black stamp of the 1856 issue of British Guiana, was sold by auction in Paris and realized what must amount to a record sum of \$35,000. It was bought by Mr. Hugo Greibert, a London Stamp expert, for an American collector. The stamp, the highest price for a stamp was \$15,500 paid last June for an 1871 2-cent Hawaiian specimen. The "one-cent 1856 British Guiana" belonged to the collection of the late Baron de la Reuniers van Veenendaal. The collector was an honorary professor at the College de France, left France on the declaration of war, and died in 1917, bequeathing his priceless collection to the Berlin Museum. It has ever since been under sequestration. The proceeds of the sale will be paid to the reparations account. The stamp was one of an emergency issue prepared by a firm of local printers in Georgetown, British Guiana, in 1856. It was first sold as a philatelic curiosity for a few shillings in 1873, and later was part of a collection sold for £120. For the unique American 5-cent stamp of Bosawen (New Hampshire) 1823-75, \$12,000 at present rate of exchange) was paid on behalf of Mr. Hind, a wealthy American collector. The total amount realized at the sale was over \$600,000. There is still in the world (or in the States) a lot of money for fads.

English Minister Starts Fruit Farm

Emigrates to Canada to Give Sons Better Opportunities

To start fruit farming in Ontario, the Rev. Ambrose Vevers, Congregational minister of Lafford, Devon, sailed recently with his wife and family from Liverpool.

Mr. Vevers is 62 years of age, and he explained that he was emigrating so that his sons would have a better opportunity to get on in life. Two sons had already gone out, and besides his wife, Mr. Vevers is accompanied by two other sons and two daughters.

Prior Offer to World

Owing to the weight of authoritative opinion in Great Britain and elsewhere, the £20,000 offered by Lord Altholston, owner of the Montreal Star, for cancer research work will go to the Imperial Cancer Research Fund in London, while the second £20,000 will remain as originally offered as a prize for the discovery of a cure for cancer, says Reuters' correspondent at Ottawa.

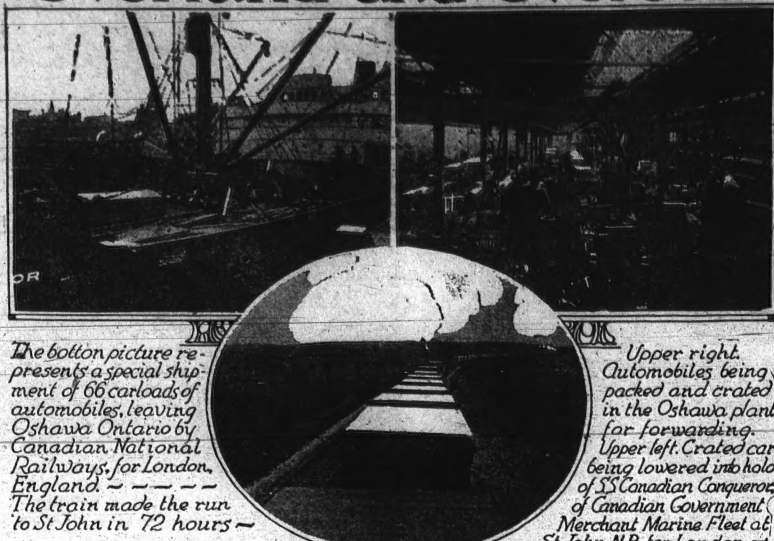

The prize will be open to the world and the award will be made by the Royal College of Physicians and the Royal College of Surgeons of London.

New Creameries for Alberta

New creameries are being built in several sections in the northern part of Alberta. Cheese factories are being erected at Rossmore, Round Hill and Calmar, and a creamery is being built privately at Wetaskiwin. A creamery is also being built at Peace River Crossing and another at Berwyn, end of steel on the Edmonton, Dunvegan and British Columbia Railway.

| Memoirs of the Ex-Kaiser | Milk as a Body Builder | After the Pennies | World's Climate Changeless |
|--|---|--|--|
| <p>Wilhelm May Get One Million for Foreign Rights</p> <p>The Daily Chronicle publishes the following Berlin dispatch: "Ex-Kaiser William has practically completed the manuscript of his long-expected book. Parts of it have been shown to likely foreign buyers. I believe the ex-Kaiser is standing out for \$1,000,000 for the foreign rights, and that he is practically certain to get that sum. At the present rate of exchange the amount is equal to nearly 300,000,000 marks, or four times what he has received from Germany since the revolution. Beside that figure the royalties from the sale of the German edition will be small indeed.</p> <p>The ex-Kaiser has, of course, had literary and other help in turning out the MS. and has appealed to many of his old friends and advisers for counsel in the matter of what to say and what not to say. I hear Hindenburg was consulted with regard to a considerable portion of the narrative. The volume will contain a very careful and guarded story. It will, of course, be argumentative and provocative regarding some of the happenings during the main period it covers—a number of pre-war years and those of the great world struggle. There will be no political surprises, sensations or indiscretions."</p> | <p>Protein in Milk Rates High in Food Value</p> <p>Man's efficiency depends much on the condition of his health, which in turn depends greatly on the food he eats. From food the body gets the material for development, upkeep and repair. Of the many constituents of food, protein takes first rank in nutritive value. It is found in eggs, meat, cereals, legumes, fish and in milk and most milk products. All proteins, however, have not the same value; some foods supply protein of greater physiological use than that supplied by other foods. Experiments show that when protein from cereals is the only protein in the diet of growing animals, the body of the animal is able to use only about 30 per cent, but when milk is the only source, the body can make use of as high as 65 per cent. Furthermore, when an animal is fed both cereal and milk protein in combination, it can use all the milk protein and a much higher percentage of the cereal protein than would otherwise be the case. It is easy to translate this into every day practice. For instance, if we give a child cereal alone, only a small percentage will be used to do its special work in the body, but if we add milk generously, not only will the milk protein be of the greatest value, but a much higher percentage of the protein contained in the cereal will be utilized. This is true of such simple combinations as bread and milk, oatmeal and milk, rice and milk, etc., and although these foods have long ago proved their worth, we have only recently understood the real reason of the importance and the combination. These facts and others calculated to give reliable information on the value of milk as food are brought out by the Department of Agriculture at Ottawa in a publication, entitled "Why and How to Use Milk," which also contains many recipes.</p> | <p>The Fraction of Currency Gaining a New Importance</p> <p>It is not so long ago that in Western Canada the humble copper was despised—nothing less than a nickel counted—indeed, in many of the smaller centres coppers are looked upon with suspicion even now. Times are changing—changing fast—the west is realizing that the day of long profits has gone. We are patterning ourselves on institutions which calculate their percentage of profit in fractions of a cent.</p> <p>No more striking example of the tendency to make volume the desired objective is offered than the recent action of a Canadian bank in putting out an extensive advertising campaign for deposits of very small sums. Instead of the haughty invitation "one dollar opens a savings account," they now cordially invite initial deposit of one cent. Different plans are offered to encourage the small depositor, one being that he should start with a cent the first week and each week make the deposit one cent larger. The second week the deposit would be 2 cents and in the 50th week the deposit would be 50 cents. The result of accumulation will be \$12.75 in 50 weeks. The plan may be reversed by paying the larger sum first and decreasing it one cent weekly until at the end of the period the deposit is only one cent.</p> <p>If the depositor wishes to increase the amount of the weekly payment this can be done to any extent, two cents a week, five cents a week, twenty-five cents a week, or any other amount. Under these plans the money is not repayable for a stipulated period.</p> <p>When so dignified an institution as a Chartered Bank will upset all precedent to increase a volume, even if it involves handling many small accounts at a loss, it carries a strong suggestion for the retailer to cut his profit margin to the lowest possible limit and work for turnover in order to start the wheels of industry turning with their old-time speed.</p> | <p>World's Climate Changeless</p> <p>Scientists Claim That There Have Been No Changes Throughout the Ages</p> <p>The first striking fact in the geological history of climate is that the present climate of the world has been maintained since the date of the earliest, unaltered sedimentary deposits. The oldest sandstones of the Scotch Highlands and the English Longmyndas show that in pre-Cambrian times the winds had the same strength, the raindrops were of the same size, and they fell with the same force as at the present day. The mean climate of the world has been fairly constant, though there has been local variations which have led to the development of glaciers in regions now ice free, at various points in the geological scale. That there has been no progressive chilling of the earth since the date of the oldest known sedimentary rocks is shown by their lithological characters, and by the recurrence of glacial deposits, some of which were laid down at low levels at intervals throughout geological time, according to the United States geological survey.</p> |
| <p>Expend Less Energy and Therefore Usually Have the Last Word</p> <p>The woman who maintains her weight is more valuable than men do not perhaps know that there is a scientific explanation for the phenomenon discovered some years ago by a French investigator. The average male, he asserted, speaking for the race, has the strength to enable him to lift a 2 lb. weight 40 ins. from the ground every minute. But that is only one-fifth of the energy wasted by a typical tub-thumping average-speaker, who might as easily be lifting coal from the floor to his shoulder. The female voice, however, is of quite a different calibre, for its mechanism requires so little horsepower to operate that a woman can, we are assured, talk four times as long or four times as easily as a man for the same expenditure of energy, which explains Professor Jespersen's discovery, as well as the widespread belief that in a discussion the woman invariably has the last word.</p> | <p>Will Distribute Seed for Silage</p> <p>Sunflowers and corn seed for silage will be distributed by the Provincial Government to Alberta farmers during the summer. Every farmer may secure up to 50 lbs. of sunflower and corn seed, or part of each up to that total. The scarcity of feed last winter is likely to lead to large numbers of the farmers going in for silage this summer, especially in view of the proved value of the trench silo.</p> | <p>Arrange for New Brick Plant</p> <p>Business men who have been identified with brick interests in Edmonton for the past twelve years have completed arrangements for the installation of a brick plant at Grande Prairie to supply the markets of the Peace River country. Suitable clay deposits have been secured and the first machinery has arrived. It is hoped to be producing early enough to supply material for some of the larger structures planned for this year.</p> | <p>Paint Used by Ancients</p> <p>Various Forms of Paints Used Since Time of the Pharaohs</p> <p>Paint is not a modern invention, indeed, white lead is of ancient origin. The story is told of the wife of the famous Greek General Xenophon, who had the habit of smearing white lead on her face and wearing high heels until her husband told her she thought her pretty enough as she was without the application of artificial aids to beauty. There is a reference traced back as far as the seventh century, A.D., which is the first recorded instance of the use of paint to cover a wooden carriage, very much in the manner prevalent today. There are earlier historical mentions of the use of paint, but these refer more to uses such as glue and special paints such as those made with wax and used by the Romans in admixture with glue to paint their ships of war. The Egyptians used glue sizes and varnishes. The mummy cases in museums indicate that clearly and probably for the earliest examples of varnished articles in existence.</p> |
| <p>Manufacturing Sandpaper at Victoria</p> <p>The Western Abrasive Paper Co., Ltd., has been incorporated with headquarters at Victoria for the purpose of manufacturing sandpaper. The company is using as a base material a hard crystalline quartz from the Prince Rupert district, which has proven to be of hardest quality.</p> | <p>New Canadian Industry Possible</p> <p>Possibilities of the establishment of a new Canadian industry are suggested by the visit to Toronto of Col. John Jardine, world-famous manufacturer of lace-making machinery. He is making a survey of the situation in Canada with a view to submitting certain recommendations to his firm on his return to England.</p> | <p>Agricultural Wealth Decreased</p> <p>The gross agricultural wealth of Canada for 1921 is estimated at \$6,831,025,000, as compared with \$7,612,151,000 for 1920, a decrease of about ten per cent. The decrease is due to the heavy fall in the price of agricultural and livestock products. In the total estimate land account for \$3,156,976,000; buildings, \$1,025,712,000; implements, \$291,660,000; livestock, \$766,720,000; poultry, \$38,907,000; fur farming, \$5,884,000; and agricultural production, \$1,398,225,000.</p> | <p>Increase in Ontario's Population</p> <p>The total population of the province of Ontario increased in 1921 by 116,622 over the figures of 1920 and amounted by \$4,145,589 according to the latest municipal statistics. The report shows Ontario's total population at the end of 1921 as 2,738,407, of which figure cities account for 1,166,515; urban, \$40,588; and rural, 1,031,054. The report credits Toronto with an assessed population of 512,812.</p> |
| <p>Of the 259,390 civilian population of the Hawaiian Islands, 114,579 are Japanese.</p> | <p>Frozen Eggs Shipped East</p> <p>Operations have commenced at the new egg melange plant opened at Winnipeg by the William Davies Company, for the exploitation of the Hull process of freezing eggs. The product is being shipped east where it is used in the manufacture of confectionery.</p> | <p>Crop Yields for 1921</p> <p>Returns of crop yields for 1921 from 3,214 threshing machines give a total of all grains for Alberta of 56,447,372 bushels. Winter wheat averaged 16.98 bushels per acre; spring wheat, 11.78 bushels; oats, 30.13 bushels; barley 23.54 bushels; rye, 21.07 bushels; and flax, 4.78 bushels.</p> | |
| <p>The bones of an average woman's skeleton weigh about 14 pounds.</p> | | | |

The bones of an average woman's skeleton weigh about 14 pounds.

FOURTH-FORTNIGHTLY

CROP REPORT

Dry conditions prevail over the major portion of the province, and the need of rain is urgent, but generally speaking, the condition of the crops in Alberta is fairly satisfactory. At the present date, according to the official reports which have been received by the agricultural department.

The south-western portion of the province has been favored with a considerable amount of moisture since May 1, and crop conditions there are better than for some years, and give indications of producing an excellent yield. The entire western half of southern Alberta is, in fact, showing a very encouraging condition. Another cheering feature of the present situation is that the grasshopper campaign is proving effective in most districts and the percentage of loss from this cause will be small.

The south-eastern and central areas of the province, however, are experiencing very dry conditions, and many places are in urgent need of rain but the grain is standing up well in spite of the lack of moisture. Good general rains before the end of June will put the grain in a very satisfactory shape.

Timothy and other hay crops in the central and northern districts will be light this year. Alfalfa and rye are showing splendid growth in the south, but in the north rye and root crops have suffered from lack of moisture and from the severe frost of ten days ago.

South-Western areas—Good growing conditions prevail from Calgary south to Lethbridge and to the boundary and westward, where precipitation has been reasonably heavy. Rye

is 80 inches high, spring wheat shows a vigorous growth of from 5 to 7 inches high. Alfalfa will be ready to cut within the next ten days. Considerable summerfallow is being done. Grasshoppers are very numerous and active, but are being checked in many localities by effective work with bait. South-Eastern areas—Rain is needed everywhere, precipitation having been light since May 1, but grain will not suffer greatly for another week. South of the Red Deer river to the boundary and east of Calgary to Medicine Hat very dry conditions prevail although there have been some good local showers. Alfalfa and rye crops are splendid and the pasture in most localities is the best for years and livestock is in generally good condition. Further local showers fell over these areas the latter part of the week.

Central areas—Dry conditions prevail almost the entire distance from Edmonton south to Calgary, the section suffering the most being from Olds south to Calgary and eastward. There have been some local showers, and general rains before the end of June will put the grain in a satisfactory condition. Rainfall, however, has been light over the whole territory from Edmonton to Calgary and eastward toward the boundary and along the main lines of the national railway.

Northern areas—Northern areas are experiencing dry conditions, but the crop generally is still satisfactory. Good local showers fell Friday, June 16, over the Edmonton district and south along the C. & E. Grande Prairie and Peace River districts report some need of rain. From Edmonton east to the border and west to the foothills, pasture and hay crops have suffered from lack of

Cowley Happenings

Arthur Baines, of Lethbridge, was a recent visitor to Cowley.

Ed. Baines and Miss Gladys motored to Lethbridge for the week end.

Mr. and Mrs. Edwards were Cowley visitors Friday.

Sidney McCabe, of Cranbrook, was in town on Sunday last.

P. Hargrove, of the Union Bank staff is spending his vacation with his parents at Monitor, Alberta.

The baseball dance held recently was very poorly attended owing to the warm evening.

Quite a number attended the Lundbreck sports and golf course opening on Saturday.

The local Oddfellows held memorial service in the local church and later at the cemetery Sunday last, quite a large number being in attendance.

A party consisting of Mr. and Mrs. Bundy, H. D. McMillan and several friends from Blairmore, spent Sunday at Waterton Lakes, and report a very enjoyable visit.

The local troop of Trail Rangers hiked to Lundbreck Falls and spent Friday night in camp, under the leadership of Paul Moore, our popular pilot.

Ed. LaBrie joined the bandits last Tuesday, when he and Miss Lena Franz were united in marriage, the ceremony being performed in Blairmore. The happy couple are at home on the Rancho.

moisture, but the grain is standing up well and will show splendid growth if good rains come along soon. Frost ten days ago did damage to corn and to root crops.

A MEMORIAL CHURCH

An enterprise, unique among efforts to commemorate permanently the splendid courage and devotion of those who made the supreme sacrifice in the Great War, is now well under way in Montreal. A fine church will be built by Trinity Parish Corporation, in the growing suburb of Notre Dame de Grace, which, in addition to making provision for the needs of its own people numbering many hundreds of families, will incorporate in its architecture, appointments, and arrangements for regular "ville services, every feature that can be adopted to make it a great Permanent Memorial to those who, in the Great War for the preservation of civilization, gave all that man can ever give, to the last full measure of devotion.

Before the war Trinity church carried on its work in what was for old Montreal a good and strategic location. St. Denis Street and Place Victoria Square. The traditions of "Old Trinity," built up during several decades of steadily increasing usefulness, embodied, as a first principle, the rule that public services, of an inspiring and uplifting character in the Church should be followed by some form of public service outside of it, in which the clergy and lay workers had the opportunity to engage. All classes of the people came under the influence of the church, whose activities were probably more varied and widespread than those of any other church.

But the constant operation of the law that population in all great cities tends to move westward finally brought the authorities to the decision, regretfully reached however inevitable, that the work of the Parish must be carried on from a centre in the west end of the city. A suitable site was selected in Notre Dame de Grace, on the south side of Sherbrooke Street, between Marlowe and Northcliffe Avenues.

As Trinity is one of the most important parishes of the Anglican church in Canada, it was felt that the new building should be something more than a Parish Church. At the old headquarters the church had for many years included among its parishioners, from time to time, large numbers of people only temporarily

HIGH PRAISE from a Standard Authority

Recently a week's trial trip through England was made by a member of the staff of "Autocar," one of the highest British authorities on motor matters. The results of this trip emphasize the practical points of the Light-Six for the owner-driver. A few extracts are printed below:

"It is unusual to encounter a five-seater car selling in the neighbourhood of £500 with a performance equal to it. . . . Its six-cylinder engine is remarkably silky in its operation, silent, flexible to a wonderful degree. . . . Our first trip was through London traffic, but we soon felt thoroughly at home, since the control gear is free and easy of operation, and the engine is content to tick over on top gear at speeds even below normal walking pace."

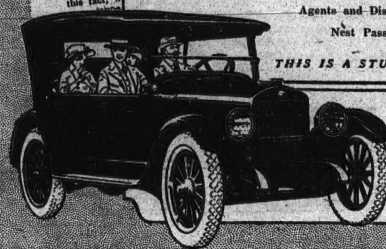

Lack of space prevents us from quoting the full comments in this article. However, we will be glad to send a reprint of the article in full to anyone who is interested.

BOUNDARIES OF THE DROUGHT AREA RELIEF ACT

Commencing at the intersection of the north boundary of the 34th Township with the eastern boundary of the province, thence westerly along the

located in Montreal, and representing in the aggregate practically all sections of Canada. So the rapid growth of the city within the past ten years, while it steadily increased the number of such adherents, plainly indicated that, if this fine record for making provision for the temporary resident and casual visitor was to be maintained and strengthened, the regular congregation would have to widen their outlook, and establish the "New Trinity" on a much larger and more extensive scale.

said north boundary of the 34th Township to the line between ranges 15 and 16 west of the 4th Meridian, thence southerly along the said line between said ranges 15 and 16 to the north of the 21st Townships, thence westerly along the north boundary of the 21st Townships to the line between ranges 25 and 26, west of the 4th Meridian, thence southerly along the said line between ranges 25 and 26 to the north boundary of the 9th Townships; thence westerly along the north boundary of the 9th Townships to the western boundary of the province; thence southerly following the western boundary of the province to the point of intersection of the north boundary of the 9th Townships, thence easterly along the north boundary of the 6th Townships to the line between ranges 26 and 27, west of the 4th Meridian; thence

southerly along the said line between said ranges 26 and 27 to the north boundary of the 5th Townships; thence easterly along the north boundary of the 5th Townships to the line between ranges 21 and 22, west of the 4th Meridian; thence southerly along the said line between said ranges 21 and 22 to the southern boundary of the province, thence easterly along the southern boundary of the province; and thence southerly along the eastern boundary of the province to the point of commencement.

Burning Up Money

The fire loss in Canada during 1921 amounted to more than \$45,000,000 and exceeded that of any previous year in the history of the country. Returns for the present year indicate that conditions are going from bad to worse. During the first four months of 1922, losses have amounted to \$79,206,000, or almost \$5,000,000 per month.

The above figures are taken from a new publication called "Fire Control," published by the Department of Insurance at Ottawa, which has been forced to take notice of the rapidly increasing fire waste in Canada and has become impressed with the necessity of calling public attention most forcibly to it. If the enormous fire loss in Canada each and every year is to be lowered it is imperative that the general public be aroused to a greater sense of individual responsibility for existing conditions.

It is estimated that directly and indirectly, without taking into account loss of life and injuries resulting from fires, Canada's fire burden in 1921 totalled the enormous sum of \$99,435,770. This great sum of almost one hundred million dollars is paid directly by property owners, but subsequently, through the channels of business, every individual in Canada bears his or her share of the burden. So distributed it amounts to \$11.35 per capita of the population and constitutes a tax of more than \$50.00 per annum upon the average family. Other taxes produce something in the way of service, but this fire tax of one dollar per week per family yields no return.

There is a popular notion that the loss sustained in fire is, in the vast majority of cases, fully covered by insurance. Newspaper accounts of fire invariably concluded with the words: "Loss fully covered by insurance." We take it for granted that this means there is complete compensation for all waste and destruction caused by the fire. There is no greater fallacy. The losses resulting from a fire extend in so many directions that they can never be fully covered by insurance.

Insurance, at the most, can be collected only for the goods and property actually destroyed. There is no insurance covering the cost of cleaning up the debris preparatory to rebuilding; none for time lost in productive work while rebuilding or seeking a new location; none for profits lost on work that might have been done but which, owing to the fire, went to a competitor; none for the costly disorganization of business which results; none for loss of employment suffered by employees; none for the public who through decreased production may be called upon to pay higher prices. Yet these losses have to be paid for. Who pays if the insurance companies do not? Why, the public of course. And even if such losses were covered by insurance, the public would still pay through still heavier premiums. The only way for the public to escape these charges is to reduce the fire waste.

In the Western Provinces of Canada where the bulk of the population lives in rural parts, and where therefore it is difficult, and frequently impossible, to supply adequate fire-fighting equipment, it is especially important that all possible precautions against fire be taken and the utmost care exercised at all times. If a fire starts on the farmstead, or in a small village or hamlet, the total destruction of the building is almost a foregone conclusion because there are not, and cannot be, the efficient fire-fighting apparatus available in cities and the larger towns.

However, with the new general installation of rural telephone centres with local town and village centres, it should be possible for adjacent rural districts to unite with the town or village in providing a light auto fire equipment, combining a chemical and pumping engine and hose carriage, which would provide protection not only for the small town or village but for a considerable section of the surrounding country as well, and the rural population thus be reasonably sure that a telephone call will bring the nearby town or village fire department equipped and ready to serve them promptly. The small town or village cannot, of itself, stand the expense of providing such equipment, but through a union of forces with the adjacent rural sections such equipment could be provided without imposing too heavy a burden on anybody.

Far from being easily extinguished with automatic chemical extinguishers at very low cost, a very simple apparatus which can be used by a woman, or a child if necessary. If a blaze is started it can, through such means, be quickly smothered before it gets headway where nothing can check it.

However, there is no better way of avoiding loss by fire than to prevent fire. Once again, if any will be wiser that an ounce of prevention is worth a pound of cure. The adoption of all reasonable precautions against a fire being started is, after all, the cheapest and most effective of all measures to reduce the fire waste which today constitutes one of the heaviest taxes imposed upon the people of this Dominion.

World Wheat Supply Low

Only North America Has Surplus to Supply Demand

The world wheat stocks by July 1, will be lower than for several years, according to an analysis of the situation issued by the Commerce Department.

Both Argentina and Australia, the department explained, have considerably less wheat than last year. The United States carry-over will be light, and only Canada has considerable stocks on hand. A large de-

mand there last year, it was declared, was indicated by the "upward" trend of consumption, while the prospects are for a smaller crop.

Until next February, the department said, "the international trade will be largely dependent for supplies on the surplus of North America, and a limited quantity from India. With Russia entirely out of the export trade, North American wheat is in a relatively strong position."

Switzerland is electrifying her railways, to save importing coal.

Human Magnets

Experiments Have Proved Certain People Possess Magnetic Forces

Some experiments that are being carried out by a German doctor show that certain people possess magnetic powers like those of an ordinary magnet.

The magnetism in the hand of one person caused it to be marked, then on laying the hand on a paper sprinkled with iron filings the filings arranged themselves along the "lines of force" in a way that most of us have been done with a real magnet.

The interesting point is that, after a magnetic person has done some exercise, his magnetism seems to increase.

Dr. Grunwald, who is conducting the experiments, has made an instrument that will measure a person's magnetism.

When Your Appetite Fails This Is What You Need

When the very thought of eating makes you feel dizzy, when you run down, stomach in bad shape, you need a real housecleaning, with Dr. Hamilton's Pills. They tone up the liver, assist the stomach and improve digestion. The taste becomes aware of new flavors in food you never noticed before. You'll look and feel a whole lot better after using Dr. Hamilton's Pills. They tone up the liver, assist the stomach and improve digestion. The taste becomes aware of new flavors in food you never noticed before. You'll look and feel a whole lot better after using Dr. Hamilton's Pills.

What She Knew

A youthful and blushing bride reduced the aged grandmother of the groom to a state of collapse not long ago. When the old lady asked her if she could cook, the bride answered, "Not very well, but I know how to bake inside the stove and boil on the outside."

NEW STRENGTH FOR WEAK STOMACHS

Indigestion Disappears When the Blood Supply Is Enriched

The urgent need of all who suffer from indigestion, and who find it impossible to perform their usual function, is a tonic to enrich the blood. Pain and distress after eating is the way the stomach tells us that it is too weak to perform the work of digesting the food taken in. This condition some people foolishly resort to purgatives, but these only further aggravate the trouble.

New strength is given weak stomachs by Dr. Williams' Pink Pills. These pills enrich and purify the blood supply. They tone up the stomach, and it accounts for the speedy relief in indigestion that follows the use of Dr. Williams' Pink Pills. The appetite revives, food can be taken without discomfort and the burden and pains of indigestion are dispelled. Mr. William Johnson, a prominent business man of the U.S., bears testimony to the value of these pills in cases of this kind. He says: "I was attacked with indigestion accompanied by severe cramps in the stomach. I was prescribed for by the family doctor, but got no relief. Then I tried some of the advertised remedies but with no better result. Indeed, my condition was growing worse. Then I read of the case of a man who praised Dr. Williams' Pink Pills whose condition was similar to my own, and I decided to try this medicine. The result, I think, was amazing. My indigestion and cramps were restored to my former good health. I can therefore warmly commend the use of this medicine for stomach troubles."

You can get these pills from any medicine dealer or by mail from a box or six boxes for \$2.50, from Dr. Williams' Medicine Co., Brockville, Ont.

A Return to Good Times

When we learn that our great London hotels are experiencing something of a boom, there is little difficulty in getting "two and two together." The wheels of trade have begun to revolve again. Every week sees an added momentum. Soon they will be turning at full speed. These seemingly casual gatherings in taverns and restaurants mean much. They mean trade, trade, business of all kinds, and that means an end to unemployment and a return to prosperity. Truly the barometer points to "Set Fair." London Daily Express.

A safe and sure medicine for a child troubled with worms is Mother Graves' Worm Expeller.

A Gallant Effort

"The Rules of the Road" as posted in Tokyo are printed in the original English by the Fifth Avenue Coach Company. They are worth it.

The first of these excellent rules reads: "At the rise of the hand of the policeman stop rapidly." Another considerable regulation bids the automobilist "Beware the wandering horse that he shall not take flight. Do not explode an exhaust box at him. Go smoothly by." And there is much discretion in the order, "Go smoothly on the grease mud as there lurks the speed demon."

True indeed—New York Sun.

Print Advertisement

Literature issued by Department of Immigration and Colonization Attracts Attention

The Department of Immigration and Colonization are admitting some elation over the fact that one of the regular advertisements issued by the department and appearing in a prominent agricultural paper published in Iowa has been the occasion of one of the prizes offered by the publisher of the paper mentioned for letters on the best advertisement appearing in his paper. The prize letter suggested by the advertisement of the Canadian Department of Immigration and Colonization reads as follows:

"Western Canada offers health, wealth and 160 acres farm-free, free land and fifteen and thirty dollars an acre. It is in my opinion, the best advertisement in the April issue of the Iowa and Corn Belt Farmer."

Health, wealth, land and a home, is the goal that every man and woman of ambition is striving for, and it all can be found in Western Canada. Land is the basis of all wealth, and all other advertisements would be useless if it were not for the wealth created from the soil. Government has bought that rich land for a long time, fertile land at fifteen and thirty dollars an acre for some thirty years. And the next generation will never read an advertisement like Canada's, which offers such a large tract of land for sale by the Canadian Government may never reach five hundred dollars an acre, but who knows?

"Little did father think in 1844, when homesteading land in Iowa and using the Government's \$1.25 an acre, that this same land would sell in 1920 for \$500 an acre."

The letter was written by A. P. Besser, Elkhart, Iowa, and the advertisement referred to is one of a regular series carried by the Department of Immigration and Colonization in the agricultural press in the United States.

Sores Heal Quickly.—Have you a persistent sore that refuses to heal? Then try Dr. Thomas' Electric Oil in the dressing. It will stop itching, soothe away the proud flesh, draw out the pus and prepare a clean way for the new skin. It is a recognized healing agent. Only a few numbers of people can certify that it healed where people applied.

A Gigantic Grape Vine

Planted in 1775 and Covers 10,000 Square Feet

One of the oldest grape vines in the world is to be found in California. It was planted in 1775 and it is still bearing abundance of fruit. Towards the end of the eighteenth century Spanish missionaries introduced the first European fruit trees into the United States. They planted the vine at San Gabriel, and it now covers a surface of 10,000 square feet, its numerous branches are supported by trellis work, which is necessary in view of the fact that many bunches of grapes weigh from fifty to six pounds. Notwithstanding its great age, the vine at St. Gabriel's Mission last year bore fruit to the extent of more than ten thousand pounds.

For Sprains and Bruises.—There is nothing better for sprains and contusions than Dr. Thomas' Electric Oil. It will reduce the swelling, soothe the pain, and draw the pus out of the flesh and draw the pain. It will take the ache out of the bruise by counteracting the inflammation. A trial will convince any who doubt its power.

Indicative of Prosperity

No Country Shows So High a Percentage of Home Ownership as Canada

According to statistics recently compiled no country in the world shows so high a proportion of home ownership in the cities as does Canada. London, Ontario, heads the list with 80 per cent, or 11,200 of the 14,000 residences, occupied by the owners. Hamilton has 24,000 residences, and 14,000 owners occupying them. Calgary is represented with 13,500 homes, in which 8,500 owners dwell. Toronto is rated as having 58,500 homes, of which 47,570 are occupied by their owners. Halifax with a percentage of fifty-one is shown to have 3,225 homes, occupied by 1,625 owners. Vancouver has 23,122 residences, of which owners occupy 10,571. Edmonton has 12,000, of which 5,400 are tenanted by their owners; Winnipeg has 29,235, with 19,903 of their owners occupying them. Ottawa has 19,847 and 8,059 owners living in them, Montreal, 154,645, with 6,744 owners occupying them.

Business Woman Is Out With Statement Of Facts To Public

"Since taking Tanlac I feel so well I can hardly realize that a short time ago I was in such wretched condition," declared Miss Alysia Parth, 201 Carlton St., Winnipeg, Man., popular young business woman.

"I had a nervous breakdown which kept me in bed several weeks and left me so bad off I had scant hope of ever getting better. I was very nervous, couldn't sleep and even after I went back to the office seemed to have no strength. My stomach became disordered and indigestion caused me a frightful pain, bloating and shortness of breath. My kidneys also bothered me almost continuously and life was almost miserable."

"But soon after I began taking Tanlac I could see it was doing me a world of good. Seven bottles have relieved me of all my ailments and now my health is just fine. I think Tanlac is simply grand."

Tanlac is sold by all good druggists.

Holds Honorary Degrees

A total of 64 honorary degrees are held by Miss Currie, the celebrated European chemist and discoverer of radium. Nine of the degrees are from American colleges and universities.

No Rest With Asthma. Asthma usually attacks at night, the one time when rest is needed most. Hence the loss of strength, the nervous debility, the loss of flesh and other evils which must be expected unless relief is secured. Fortunately relief is possible. Dr. J. D. Kellogg's Asthma Remedy has proved its merits through years of service. A trial will surely convince you.

Nearest Stars Still Distant

Man has been able to calculate distance from the earth to some of the stars. The nearest stars are still so distant that it takes the light from them four years to reach us, going at a velocity of 185,000 miles every second.

The use of Miller's Worm Powders insures healthy children so far as the ailments attributable to worms are concerned. A high mortality among children is traceable to worms. These sap the strength of infants so that they are unable to maintain the battle for life and succumb to weakness. This preparation gives promise of health and keeps it.

A Dangerous Practice

Many children lose their lives every year from tetanus, or lockjaw, caused by stepping on the points of nails thoughtlessly left protruding from boards which are thrown down and left where barefoot children and children with worn thin shoes can step on them.

It only takes a few minutes to take the nails out of boards.

Better be safe than sorry.

Government Decides To Sell Part Of The Merchant Marine Fleet

Ottawa.—Hon. W. C. Kennedy, Minister of Railways and Canals, announced in the House today that twenty-seven of the smaller vessels of the Canadian Government Merchant Marine are to be laid up this year and disposed of when possible.

The House at the time had under consideration a vote of \$4,300,000 to provide a loan to the Canadian Government Merchant Marine.

The amount is to be applied in the payment of deficits in the operation of the company during the year ended December 31, 1931, to wages, capital and deficits in connection with operation during the fifteen months ending March 31, 1932, and capital expenditure in connection with the vessels.

Hon. T. A. G. Greer, advised the Government not to be too hasty in disposing of the ships. He agreed that Canada should not be called upon to pay annual deficits of large proportions on the merchant marine but thought that better prices might be secured for the vessels in a year or two that would be obtained now.

T. L. Church (Conservative, North Toronto) voiced strong opposition against any move to do away with the merchant marine. It would prove a great asset in time of war and if the merchant marine was not going to be given a chance, why not abandon the Canadian National Railways. The railways could not survive without the merchant marine.

Re-establishment of a steamship service between Atlantic and Pacific ports in Canada was advocated during the discussion of the estimates of the Department of Trade and Commerce.

The item under consideration was an appropriation of \$340,666 for the Canada West Indies service and the suggestion came from Hon. H. H. Stevens, Vancouver.

Funeral of Sir Ross Smith
London.—Reuter's Adelaide correspondent cables that the body of Sir Ross Smith, the famous Australian aviator, who was killed a few weeks ago in an airplane accident in England when testing the machine which was designed to carry him around the world, was landed there amid impressive ceremonies. The funeral was held June 15.

Studied British Livestock Markets
Ottawa.—Miss E. Cora Hind, commercial editor of the Manitoba Free Press, is en route home from a trip to the British Isles, where she studied the livestock marketing situation.

Plan To Create New Wheat Board Is Now Approved

Ottawa.—The House today approved the report of the agricultural committee recommending creation of a wheat marketing agency to handle the 1932 crop. Under the terms of the committee's report, the marketing agency is not to be given the direct handling of flour and mill products and the act creating it is to become effective by proclamation "as soon as two or more of the provinces have conferred upon this agency such powers possessed by the wheat board of 1919 as come within provincial jurisdiction."

There was protracted discussion on the respective methods of the compulsory and the voluntary pool. Right Hon. Arthur Meighen, leader of the Opposition, complained that the wheat board was being submitted to a long and cruel process of straggle and the House should not be asked to put in the final act. He favored a voluntary board. The Opposition policy was subsequently expressed in an amendment submitted by Donald Sutherland of South Oxford, calling for reference of the report back to the agriculture committee with instruction to amend it so as to read:

"It is desirable in the national interests that the Government immediately create a national wheat marketing agency, similar to the Canada Wheat Board of 1919, but on a voluntary basis, fully in accordance with the powers of Parliament for the marketing of the wheat crop of 1932, and that to this end Federal legislation be introduced immediately, such legislation to provide further that the said government in connection, exercise such further powers or duties as may be conferred upon it."

Illegal Traffic in Drugs

Government Proposes Drastic Means to Stamp Out Evil

Ottawa.—The peddling of drugs to minors is to be made liable to the lash, and his minimum term of imprisonment will be increased to seven years. If a bill which went through the House of Commons receives the approval of the Senate, the bill amends the Opium and Narcotics Act, and, as it left the committee, adds other sweeping penalties for the drug trafficker. It provides among other things that:

(1) Drug traffickers may be imprisoned without the option of a fine.

(2) Right of appeal forbidden to those convicted in a lower court of trafficking in drugs, except in a stated case on a point of law.

(3) Aliens convicted of illegal trafficking in drugs liable to deportation after serving their sentence.

Plans for a tightening of the penalties on drug traffickers came chiefly from British Columbia members, J. L. Laderg, Conservative, Vancouver South, submitted the amendment for the lash. Men who supplied habit-forming drugs to boys and girls should be whipped, he declared. The amendment went through with little opposition, although Hon. D. D. McKenzie, Solicitor-General, took the view that the lash might cripple a man for life.

Indian Federation Impracticable
London.—"So long as public opinion stands where it is today, West Indian Federation in the larger sense is impracticable," is the conclusion of the report of Major E. F. L. Wood, parliamentary under-secretary of the colonies, on his recent visit to the West Indies. Major Wood points out that the primary and most serious difficulty in the way of federation is the great distances separating the colonies.

Negotiations on Mandates Progressing
London.—Cecil Harmsworth, under-secretary for foreign affairs, told the House of Commons that good progress had been made in negotiations between Great Britain and the United States with regard to territory to be held under the "A" and "B" mandates, when he was questioned on the subject. He hoped a complete agreement would be reached soon.

The shrimp industry of Louisiana employs more than 20,000 people.

Plan for Restoring Former Dual Monarchy

Power Asked to Give Austria Twenty Year Credit

Paris.—The Allied Council of Ambassadors decided to request the remaining governments, creditors or Austria, who have not yet renounced their claims against her, to do so for a period of twenty years. The desire is thus to permit the application of the credit system which has been elaborated for the restoration of the former dual monarchy.

Charles Depoff, French Minister of the Harve, headed the delegation which France sent to The Hague. This delegation, however, only attended the preliminary meeting, June 15, the experts not being expected to arrive until later, about June 25.

The German Government notified the Reparations Commission that it would pay the regular monthly installment of 50,000,000 gold marks on the date fixed for this payment. The commission is awaiting word from Germany as to what measures she intends taking to carry out the provisions of the commission's ultimatum now that the international loan has failed to materialize. The commission is also awaiting word from Germany requesting further minor improvement in the budget and arrangements for financial reforms.

Making of Home Brew

Will Likely Become Illegal in Canada in Near Future

Ottawa.—"Home brew" will shortly be illegal in Canada if the House of Commons in its recent vote on the budget resolutions passed one of the proposed amendments to the Inland Revenue Act, placed before it by Hon. W. S. Fielding, Minister of Finance.

The effect of the amendment will be according to officials of the department of inland revenue, that once the amending bill has passed the House and receives royal assent, thousands of licenses issued to individuals allowing them to brew beer for their own use will be void.

After this bill comes into effect no one except brewers, regularly licensed as such by the department of inland revenue, will be permitted to brew beer.

Until the House passes the bill and it receives royal assent it does not become law, however, so there is a short respite for those who have been making their own beverages.

Canadian Riflemen Going to England

Team Representing Canada Will Sail On June 24

Ottawa.—The rifle team to represent Canada at the competitions of the N.R.A. of Great Britain will assemble in Montreal, Friday, June 23, and sail on the White Star S.S. Canopic the following day. The members of the team are: Lt. A. M. Blackburn, Winnipeg; Sgt. W. Jaffray, Toronto; Lt. Francis, Ottawa; Major C. R. Crowe, Guelph; Pte. A. W. Whitehead, Ottawa; Pte. E. W. Sallwood, Vancouver; Pte. H. Kent, Toronto; Lt. Alex. Martin, Calgary; Lt. J. Chandler, Woodstock, N.B.; Sgt. T. Young, Toronto; Pte. J. Lonsdale, Toronto; and Major F. W. Urton, Ottawa.

By making your purchases from your home merchant you are contributing direct to the prosperity of the community in which you live.

Semenoff Returns to Orient
Cossack General Was Recalled by Petition from Siberians
Vancouver.—Recalled to Asia by petitions which are said to contain the names of numbers of Siberians, General Gregory Semenov, chief of the Cossacks, sailed from Vancouver for the Orient on the Canadian Pacific Imperial of Asia. General Semenov will proceed direct to Harbin, Manchuria, and from there his actions will be directed by the counsel of his advisers.

General Semenov, it is said, is returning somewhat buoyed up in hopes and expectations on account of information which he gathered while on his visit to the United States. He was glad to be back in Canada and stated he enjoyed the rest he experienced while under the Canadian flag. His United States "experience" had been somewhat strenuous, but he voiced no criticism of the United States Government, though speaking freely of individuals who were active in opposing him.

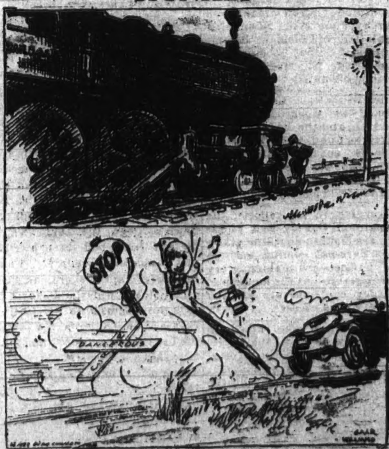

China Appoints Foreign Minister
Dr. Yen Will Fill Post in New Central Government
Peking.—Dr. W. W. Yen, former foreign minister, has been reappointed to that post in the new Central Chinese Government. Dr. Yen has also been named acting premier and is expected to be made premier in the event of Wu Ting-fang, foreign minister of the Southern Government at Canton, refusing to be President-Lie premier.

General Wu Pei-fu, the outstanding military figure of China by reason of his recent defeat of Chang Tso-Lin the Manchurian leader, has been chosen minister of war in the Peking cabinet. Dr. Wang Chung-hui, a lawyer of international repute, will be minister of justice.

For Mount Everest Summit
London.—According to reports from Tibet, two selected members of General Bruce's expedition party are now attempting to reach the summit of Mount Everest, the goal of the expedition, said a Calcutta despatch to the Morning Post.

Gandhi's Successor Arrested
Lucknow, B.I.—Quereb, who succeeded Mohandas Gandhi as editor of Young India, has been arrested following publication of alleged sedition articles in the newspaper.

SIGNALS

Approval Is Given To Bill To Prevent The Export Of Liquor

Radio Messages on Canadian National Trains

Vancouver.—What is said to be the first time in the history of railroading in Canada, the experiment of sending radio messages from a moving passenger train, has been tried out on the Transcontinental Limited of the National Railways. Messages were received from Vancouver on board a train which was in the vicinity of Hope, B.C., eastbound from Vancouver. The messages were received perfectly, until the train ran into an atmosphere that was disturbed by an electrical storm overhead and interruptions were frequent. Should the experiment prove successful, it is possible that all Canadian National trains operating in the west will be equipped with radio, it is stated.

Mennonites Wish to Return

Saskatchewan Man Who Went to Alabama Makes Bad Move

Ottawa.—An interesting sequel to the movement some time ago of the Mennonite settlers from Western Canada to the United States has just occurred in the form of an appeal received by the Department of Immigration and Colonization for assistance to enable some of these settlers to get back to Saskatchewan. The appeal comes in a letter from a former settler at Ernfold, Sask., who writes from Mt. Airy, Alabama. After pointing out that conditions have not been such as he expected to find, this settler continues:

"We would like to hear from you if it would be possible for your Government to help us out here. I mean I think we will be glad to use money to get back to our farms again. We cannot stay here as we are in such bad shape now that we don't know what will become of us. I grant you to help us out. My intention never was to leave Canada, and I was talked into doing so and I am very sorry that I did."

Find First Series Of Gold Coins

Unearthed in Ruins of Sardis by U.S. Archaeologists

New York.—Thirty gold coins belonging to the first series of gold coins ever minted have been unearthed by United States archaeologists working in the buried ruins of Sardis, the ancient Lydian capital in Asia Minor. News of the discovery was brought here by Dr. T. Leslie Shear, Columbia University, one of the members of the expedition who was present when the coins were discovered. The coins were minted some time between 561 B.C. when Croesus ascended the throne of Lydia, and 546 when he was captured by Cyrus, the Persian King.

Britain Adopts Daylight Saving
London.—The House of Commons passed the summer-time bill by 207 to 26. The bill brings Great Britain into line with other European countries in permanently fixing daylight saving period.

Political Air Cleared By Division On The Budget Proposals

Ottawa.—The division on the budget clears the political air. In the view of political observers, however, it has dispelled any idea of a general election, at any rate until after a redistribution bill is brought down next session. Nevertheless, considerable significance is attached to the fact that the Government majority of 19 was dependent on the nine Progressives who voted against their leader. That they voted "with" him, the House would have divided on an even vote, and the carrying of the budget would have been dependent on the casting vote of the Speaker.

There is also considerable comment on the nature of the split in Progressive ranks. Of the nine who supported the budget, seven were from Ontario, and two from British Columbia. All Progressives from the prairie provinces voted against the budget. Does the split, it is asked, indicate a veering of the eastern Progressives towards the Liberal point of view? Liberals are inclined to think it does.

It was expected that the Government majority would be dependent to a large extent on the Progressive abstentions. As events turned out, there were no Progressives absent. They were present, but some of them were apparently unaware of the rule which requires every member present in the House during a division, and who is not present, to cast his vote.

On the Drayton amendment, seven Progressives and the two Labor men, did not vote, although in their seats at the time and not paired. The Speaker's attention was called to the fact and they were required to vote. "If I must vote," said J. T. Shaw, of Calgary, "I shall vote against the amendment."

"Under compulsion," said G. G. Coote, of Macleod, "I vote against the amendment." There is now talk of prosecution for a couple of weeks.

The public and high school examinations commenced this week.

O. Dwight Clark is superintendent of the Chautauque here this year.

Miss Blanche Pinkney visited Calgary last week end to attend the Storey-Masters wedding.

BORN.—To Mr. and Mrs. M. Carino, on Sunday, June 18th, a son.

F. W. Andrews, of Grimsby, Ontario, is at present visiting Joe Little. He intends spending several days here.

Fernie still maintains an undefeated record, thereby being at the head of the East Kootenay Baseball League.

Several repairs are being effected to Greenhill mine and a large number of men are employed daily.

Fitzsimmons and Palmer, Lehighbridge aviators, left yesterday afternoon on their cross continent flight.

Lieut. Yarlott, of the Salvation Army, will hold his farewell meeting in the Salvation Army Hall, Coleman, on Sunday next, June 25th.

The Cardston Chautauque opened on Tuesday last. Their program is exactly in order with the one now being carried on here.

Mr. and Mrs. W. Foster, of Hillcrest, Alberta, announce the engagement of their daughter Margaret, to Mr. W. F. Dewar, of Calgary.—Calgary Herald.

J. W. Graham, late of Lehighbridge and formerly of Vancouver, is working on the new company building being erected by Contractor Thomas, of Calgary.

The Western International Baseball League, comprising Calgary, Edmonton, Vancouver and Tacoma has gone floozy. Tacoma was the main trouble, as they could not meet their expenses.

Rev. Mr. Noes, of Toronto representing the Presbyterian church, was in town last Tuesday. He is conducting work among the Chinese and speaks their language very fluently.

The Alberta Government Telephone employees have adopted the slogan “The Silent Partner.” It seems to fit, for no doubts they are the silent partners on more than one talk over the phone.

E. J. Pozzi had a slight accident to his McLaughlin car Saturday morning when one of the front wheels came off just in front of the Vulcanizing shop. Luckily no serious damage was done.

A quiet wedding took place at the Union church manse on Saturday, June 17th, when Miss Beulah Barr, of Coleman, became the bride of Sidney T. Murry, of Spring Ridge, Alberta. Rev. W. T. Young officiated.

Price Benbow, of Calgary, was drowned at Cooking Lake on June 11th, and the body was recovered on Sunday afternoon last. Benbow's cousin, Miss Violet Smith, who was rescued at the time Benbow was drowned, died Saturday from pneumonia.

According to all reports, the crops around Cowley and Lehighbridge are looking fine and grasshoppers are not coming out too bad. Farmers are making every effort to stamp out the hoppers as best they can, and are meeting with very good success.

The veterans who liked to Ottawa now declare that they will again march to the capital and stay at the parliament buildings till driven out at the point of bayonets. Some of them you would think, should have a little more respect for “cold steel.”

Yesterday was the longest day in the year. Turn on those lights!

W. Scott has put an awning over the front of his store.

Thos. Dawson is applying a coat of paint to his residence this week.

The Dads and Non-Skids will play a league game of their indoor baseball schedule on the diamond, Monday night next, at 7 p. m.

Brown: “If a thief entered the cellar, would the coal shoot?”

Jones: “No, but the kindling wood.”

The local mine rescue and first aid teams are practicing for the competitions being held at Banff on June 30th and July 1st.

School and town tax notices are now being sent out. Be sure to pay yours early and get the discount.

Forest fires in British Columbia have jumped from 393 to 517 during the past week, owing to the dry spells.

Mrs. G. A. Passmore left for the state of Michigan last Monday night, upon receipt of the news of her mother being seriously ill.

A baseball game may be arranged with some town east of here, to be played on the local diamond this week end.

The fishing season opened last Thursday and accordingly to several local anglers, the fish are not biting very good yet.

A dance is being held in the Greenhill Grill on Saturday night next. Mrs. Altmatt's orchestra, of Pincher Creek will supply the music.

A special sitting of the district court was held here on Tuesday. The regular sitting took place on Wednesday. The docket of cases will be published next week.

We understand that a car of booze was seized at the Slide on Tuesday night. It was bound for points east of the Pass. The A. P. P. made the seizure.

A meeting of the miners' representatives of District 18 is being held in Calgary on Friday. P. Patterson will represent the local union, Thomas Price, of Hillcrest will also attend.

Supt. MacIntosh's car spent a few days on the siding here this week, while Mr. MacIntosh attended the special sitting of the court, in which the C. P. R. were involved.

Lieut. Yarlott, who has been here with the Salvation Army for some time past, is leaving early next week for a new post, which as yet, is unknown.

The Lehighbridge Herald carried a special “Outing Section” last week which showed some very creditable views of Blaimore, Waterton Lake, Cranbrook and Kaslo.

On Monday morning four children were playing around a foot bridge which crosses the river in east Blaimore and going out upon it, crawled into a buggy which was put in mid-stream to soak the wheels. Their movements in the buggy headed it down stream and as the current is very strong and fast there, it started off with the children aboard. Their wits attracted T. Comfort, who rushed down and saw the buggy, which by that time had been carried down some distance. Mr. Comfort ran along the shore and wading out, stopped the buggy and took the children to safety. If they had drifted on a few yards further the buggy would undoubtedly have upset as the rapids were right at hand and Mr. Comfort's quick action saved what might have been a bad fatality. The children were between three and six years of age.
